

Build a professional, modern **Streamlit dashboard** for the following existing Python Freelancer Tax Calculator.

Important: Do not add any new features or change any calculation logic. The existing Python code is the **single source of truth**. Only improve the dashboard's visual design, layout, styling, readability, and user experience.

Dashboard Title

 **Freelancer Tax Calculator (India)**

Subtitle:

Built for Freelancers | CA Rajat Agrawal

Sidebar — Enter Details

Create a clean sidebar containing exactly these inputs:

1. **Gross Receipts (₹)**
 2. Number input
 3. Default: ₹10,00,000
4. **Use 44ADA (Presumptive Taxation)**
 5. Toggle
 6. Default: ON
7. **Expense % (if NOT using 44ADA)**
 8. Slider
 9. Range: 0–90%
 10. Default: 30%
11. **Other Income (₹)**
 12. Number input
 13. Default: ₹0
14. **TDS Deducted (₹)**
 15. Number input
 16. Default: ₹0

17. **GST Turnover (₹)**

18. Number input

19. Default: ₹0

Main Results Dashboard

Create three prominent KPI cards across the page:

- **Taxable Income**
- **Total Tax**
- **Tax Payable**

Display amounts using Indian currency formatting, for example:

₹10,00,000

Make the cards visually prominent and easy to understand.

GST Status

Create a separate section titled:

 **GST Status**

If GST turnover is greater than ₹20 lakh, display:

 **GST Registration Required (> ₹20L)**

Otherwise display:

 **GST Not Mandatory**

Do not change this logic.

Advance Tax Alert

Create a section titled:

 **Advance Tax Alert**

If net tax payable is greater than ₹10,000:

 **You should pay advance tax to avoid interest**

Otherwise:

 **No advance tax required**

Do not change this logic.

Tax Saving Suggestions

Create a visually attractive section titled:

Tax Saving Suggestions

Display the suggestions generated by the existing Python conditions.

Do not add any additional suggestions or modify the existing suggestion logic.

Lead Generation Section

At the bottom, create a professional CTA section:

Get Personalized Tax Plan

Include exactly:

- **Your Name**
- **Phone Number**
- **Request Callback** button

If both fields are entered, show:

 **Our team will contact you shortly!**

If either field is missing, show:

Please fill all details

Do not add additional lead fields or integrations.

Footer

Display:

 **Powered by CA Rajat Agrawal**

Design Style

Use a premium but simple **CA / fintech dashboard** aesthetic:

- Clean white/light background
- Professional blue/navy accents
- Rounded metric cards
- Good spacing
- Clear section hierarchy
- Professional typography

- Responsive layout
- Minimal unnecessary decoration
- Easy for a non-technical freelancer to understand
- Indian Rupee formatting throughout

Use Streamlit components such as `st.columns()`, `st.metric()`, `st.container()`, `st.success()`, `st.warning()`, `st.error()`, and custom CSS where useful.

Strict Requirement

Do **not** add:

- Old vs New regime comparison
- Additional deductions
- Capital gains
- Detailed GST calculations
- PDF reports
- Charts
- AI
- WhatsApp
- Google Sheets
- CRM
- Database
- Payment gateway
- Additional inputs
- Additional tax rules
- New tax-saving strategies
